

ANEESH KASHYAP K S

DATA ANALYST ENGINEER | COMPUTER SCIENCE STUDENT

ksaneeshkashyap@gmail.com | 7397303538 | Chennai | github.com/aneeshkashyap | linkedin.com/in/aneeshkashyap-k-s

SUMMARY

Third-year Computer Science student focused on Data Analytics, with hands-on experience in Python, SQL, Pandas, NumPy, Exploratory Data Analysis (EDA), and Data Visualization. Developed data-driven projects involving Ola/Uber cancellation analysis, Delhi weather and AQI trends, sports footwear sales and consumer behavior, and ICC T20 World Cup 2024 cricket analytics. Skilled in data cleaning, preprocessing, statistical analysis, trend identification, visualization, and extracting actionable insights from datasets. Experienced in building interactive dashboards and AI-assisted development workflows using Claude Code and Antigravity, leveraging rapid prototyping and vibe-coding to accelerate project development.

INTERNSHIP EXPERIENCE

Machine Learning Intern

1 Month

Future Interns

- Built multiple **end-to-end ML pipelines** — Customer Churn Prediction Web App, Sales Forecasting system, and a Customer Support Semantic Chat-bot.
- Covered full project life-cycle: dataset preprocessing, model building, evaluation, deployment integration, and usability improvements.

Data Analytics Intern

2 Months

3Skill

- Developed **Ola/Uber Cancellation Analysis** using Python, Pandas, NumPy, and data visualization to identify ride-cancellation patterns and analyze customer and driver behavior.
- Performed Delhi Weather & AQI Analysis, applying data cleaning, exploratory data analysis, statistical analysis, and visualization to identify weather and air-quality trends.
- Conducted Sports Footwear Sales & Consumer Analysis to identify sales patterns, product trends, and consumer behavior, transforming raw data into actionable business insights.

PROJECTS

1) Ola/Uber Cancellation Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end EDA on ride-booking data to identify major cancellation patterns across customers, drivers, vehicle types, and booking outcomes.
- Cleaned and transformed raw booking data, handled missing values, and engineered analytical features to uncover factors influencing ride cancellations.
- Developed visual analyses and comparative breakdowns to communicate cancellation trends and generate actionable insights for improving booking success rates.

2) Delhi Weather & AQI Analysis | Python, Pandas, NumPy, Data Visualization

- Conducted exploratory analysis of Delhi weather and air-quality data to identify temporal patterns, trends, and relationships between environmental variables.
- Applied data preprocessing, aggregation, and statistical analysis to investigate temperature, humidity, pollutants, and AQI variations across time.
- Created data visualizations to present environmental trends and translate complex datasets into clear, interpretable insights.

3) **Sports Footwear Sales & Consumer Analysis | Python, Pandas, NumPy, EDA, Data Visualization**

- Analyzed sports footwear sales and consumer data to identify product, category, customer, and purchasing trends.
- Performed data cleaning, transformation, aggregation, and exploratory analysis to evaluate sales performance and consumer behaviour.
- Built visual analyses to identify high-performing products and consumer patterns, supporting data-driven business insights and decision-making.

4) **ICC Men's T20 World Cup 2024 — Data Analysis & Interactive Dashboard | Python, Pandas, React, Recharts**

- Performed comprehensive **EDA on 2024 T20 World Cup match data** to analyze player, team, and tournament performance.
- Processed raw CSV datasets using Python and Pandas and generated aggregated data for interactive analysis.
- Developed a responsive **interactive sports analytics dashboard** with player profiles, match data, and visualizations for runs, strike rates, wickets, and economy using React and Recharts.

SKILLS

Programming	Python, C++
Data Analysis	Pandas, NumPy, EDA, Data Cleaning, Data Preprocessing, Statistical Analysis, Feature Engineering
Data Visualization	Matplotlib, Seaborn, Recharts, Power BI
Databases	SQL, SQLite
Machine Learning	Scikit-learn, TensorFlow/Keras, XGBoost, LightGBM, Classification, Regression, Forecasting
Dashboard & Web Development	Streamlit, React, Flask, Next.js, Tailwind CSS
Tools	Jupyter Notebook, Git, GitHub
AI-Assisted Development	Claude Code, Antigravity IDE, Gemini CLI, OpenAI Codex, Prompt Engineering, Rapid Prototyping, Vibe Coding

EDUCATION

Bachelor of Engineering — Computer Science Engineering

Sri Venkateswara College of Engineering | Chennai

CGPA: 8.1 / 10 | Current Semester: 5

Graduation: 2028

LEADERSHIP & RESPONSIBILITIES

- **Membership Chair — SVCE ACM Student Chapter | 2026–27**
Previously Design Executive, 2025–26

Promoted from Design Executive to Membership Chair, contributing to member engagement, chapter activities, and event coordination.
