

ANEESH KASHYAP K S

Software Engineering Intern Candidate | Computer Science Student

ksaneeshkashyap@gmail.com | 7397303538 | Chennai | github.com/aneeshkashyap | linkedin.com/in/aneeshkashyap-k-s

SUMMARY

Third-year Computer Science Engineering student with over a year of hands-on OOP programming experience (Python, C++) and a solid grounding in data structures and algorithms. Proven ability to apply sound, creative engineering to solve real problems end-to-end - from gathering requirements to building, testing, and deploying a solution. Experience spans full-lifecycle software projects (ML pipelines, web dashboards) in cooperative team and internship settings, with a track record of quickly learning new tools, incorporating feedback, and following engineering best practices to improve reliability and usability.

INTERNSHIP EXPERIENCE

Machine Learning Intern

1 Month

Future Interns

- Applied object-oriented Python to design and build three end-to-end software pipelines -- a Customer Churn Prediction web app, a Sales Forecasting system, and a Customer Support Semantic Chat-bot -- solving distinct business problems through sound engineering design.
- Owned the full project life-cycle (requirements, data preprocessing, model building, evaluation, and deployment integration), iterating on usability based on feedback to improve each solution's reliability and performance.

Data Analytics Intern

2 Months

3Skill

- Worked with Python, Pandas, and NumPy to build the Ola/Uber Cancellation Analysis project, engineering a clean data pipeline and applying statistical analysis to identify ride-cancellation patterns and behavior trends.
- Performed Delhi Weather & AQI Analysis, applying data cleaning, exploratory analysis, and visualization best practices to surface reliable, actionable environmental trends.
- Conducted Sports Footwear Sales & Consumer Analysis, translating raw data into structured insights that informed business decisions, while managing time effectively to deliver all three projects within the internship window.

PROJECTS

ICC Men's T20 World Cup 2024 -- Data Analysis & Interactive Dashboard | Python, Pandas, React, Recharts

- Engineered a responsive, full-stack sports analytics dashboard end-to-end -- from raw CSV processing in Python/Pandas to an interactive React + Recharts front end -- demonstrating object-oriented and component-based software design.
- Defined feature requirements independently (player profiles, match views, performance visualizations) and iteratively improved the UI based on usability testing and self-review.

Ola/Uber Cancellation Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end EDA on ride-booking data, engineering analytical features and applying sound problem-solving to uncover the drivers of ride cancellations across customers, drivers, and vehicle types.
- Built comparative visual analyses to communicate findings clearly and generate actionable recommendations for improving booking success rates.

Delhi Weather & AQI Analysis | Python, Pandas, NumPy, Data Visualization

- Investigated temporal patterns and relationships between environmental variables using statistical analysis and data preprocessing techniques.

Sports Footwear Sales & Consumer Analysis | Python, Pandas, NumPy, EDA, Data Visualization

- Cleaned, transformed, and aggregated sales and consumer data to evaluate performance trends and support data-driven business decisions.

SKILLS

Programming (OOP): Python, C++ -- 1+ year of object-oriented programming experience

CS Fundamentals: Data Structures & Algorithms, Problem Solving, Software Design

Data Analysis: Pandas, NumPy, EDA, Data Cleaning, Preprocessing, Statistical Analysis, Feature Engineering

Machine Learning: Scikit-learn, TensorFlow/Keras, XGBoost, LightGBM, Classification, Regression, Forecasting

Dashboard & Web Dev: React, Flask, Next.js, Streamlit, Tailwind CSS

Data Visualization & DB: Matplotlib, Seaborn, Recharts, Power BI, SQL, SQLite

Tools & Practices: Git, GitHub, Jupyter Notebook, Agile/Iterative Development, Code Review & Feedback Incorporation

AI-Assisted Development: Claude Code, Antigravity IDE, Gemini CLI, OpenAI Codex, Prompt Engineering

EDUCATION

Bachelor of Engineering -- Computer Science Engineering

Graduation: 2028

Sri Venkateswara College of Engineering | Chennai

CGPA: 8.1 / 10 | Current Semester: 5 (at least 3 semesters remaining)

LEADERSHIP & RESPONSIBILITIES

- Membership Chair -- SVCE ACM Student Chapter (2026-27), promoted from Design Executive (2025-26) for contributions to member engagement and event coordination -- reflecting time management and teamwork in a cooperative environment.
